BOARD OF CUYAHOGA COUNTY

ALCOHOL, DRUG ADDICTION & MENTAL HEALTH SERVICES

COMMUNITY SERVICES GUIDE

Kathryn E. Gambatese
Board Chair

William M. Denihan
Chief Executive Officer

Fold out this brochure to find an alphabetical listing of provider agencies and the alcohol and other drug (AOD) and/or mental health (MH) services (as described below) funded by or through the ADAMHS Board of Cuyahoga County:

Alternatives provide opportunities for positive behavior support as a means of reducing risk-taking behavior and reinforcing protective factors through a wide range of social, recreational, cultural and community service/volunteer activities that appeal to youth and adults.

Assessment is a process of gathering information to assess client needs and functioning in order to determine appropriate service/treatment based on identification of the presenting problem, evaluation of mental status, and formulation of a diagnostic impression to determine the need for care, and recommend appropriate services/treatment and/or the need for further assessment.

Case Management activities assist and support individuals in gaining access to needed medical, social, educational and other services essential to meeting basic human needs and may include interactions with family members, other individuals or entities.

Community-Based Process is a prevention strategy that focuses on enhancing the ability of the community to provide prevention services through organizing, training, planning, interagency collaboration, coalition building and/or networking.

Community Psychiatric Supportive Treatment (CPST) is a rehabilitative service intended to maximize the reduction of symptoms of mental illness in order to restore the individual's functioning to the highest level possible.

Consultation Service is a formal and systematic information exchange between an agency and a person other than a client generally occurring prior to admission that is directed towards

the development and improvement of individualized service plans and/or techniques involved in the delivery of mental health, alcohol and other drug services, and/or other necessary services.

Counseling, individual, family or group, involves interaction in which the focus is on treatment of the person's mental illness, emotional disturbance and/or alcohol and other drug problems and/or addiction and achieving treatment objectives.

Crisis Intervention provides immediate response to a crisis or emergency situation experienced by a client, family member and/or significant other to safely de-escalate an individual or situation, determine appropriate treatment services, and coordinate the follow through of those services and referral linkages.

Detox Services assist individuals suffering mild to moderate symptoms of withdrawal with twenty-four-hour medical monitoring (sub-acute) or twenty-four hour medically-directed assessment and withdrawal management (acute) for the purpose of alcohol and/or drug detoxification.

Education focuses on affecting knowledge, attitude and/or behavior, including decision-making, refusal skills, critical analysis and systematic judgment abilities through formal presentations made to individuals or groups designed to increase community knowledge and to change attitudes and behaviors.

Employment/Vocational Services help promote recovery by providing training and skill development that is goal-oriented, ability-based, and incorporates individual choice in securing/maintaining employment.

Information Dissemination focuses on building awareness and knowledge of the nature and extent of mental illness, emotional disturbance and/or alcohol and other drug use, abuse and addiction and their effects on individuals, families and communities, as well as the dissemination of information about prevention, treatment and recovery support services, programs and resources.

Intensive Outpatient Treatment is structured individual and group activities and services that are provided at a certified treatment program site for a minimum of eight hours per week with services provided at least three days per week.

Urinalysis detects the presence of alcohol and other drugs. Urinalysis includes laboratory testing and/or urine dip screen.

Medical Somatic Services includes the provision, prescription, or supervision of psychotropic medication or medication required in outpatient treatment of substance abuse addition.

Methadone Maintenance is intended to reduce and even eliminate heroin use among addicts by stabilizing them and helping them avoid previous patterns of drug use.

Outpatient Services provide behavioral healthcare services, including assessment, medication treatment, counseling and partial hospitalization.

Other Mental Health Services can include residential support, therapeutic and specialized foster care, respite services, payee services and transportation services.

Partial Hospitalization provides intensive outpatient services to address the individualized mental health needs for a minimum of two hours and up to a maximum of seven hours each day at a treatment facility.

Pharmacological Management is a psychiatric/mental health/medical intervention used to reduce/stabilize and/or eliminate psychiatric symptoms with the goal of improved functioning, including management and reduction of symptoms.

Prevention Services intent is to reduce the incidence, prevalence, progression or severity of AOD and/or mental health or emotional disturbance issues and can target everyone, regardless of level of risk, as well as individuals identified as "at risk," or who are experiencing problem behavior.

Referral Services respond to inquiries from people, usually by telephone, to obtain services that are either provided by the agency or by another health care organization.

Residential Treatment is a 24-hour rehabilitation facility, with 24-hour-a-day medical/nursing monitoring, where a planned program of professionally directed evaluation, care and treatment for the restoration of functioning for persons with alcohol and other drug problems and/or addiction occurs.

Self-Help/Peer Support and Consumer-Operated Services means individual or group interactions conducted by persons receiving services, persons who have received services, or their families or significant others, for the purpose of providing emotional support and understanding, sharing experiences in coping with problems, and developing a network of people that provides on-going support outside the formal mental health service system. Drop-in centers, clubhouse programs and the warmline, run by and for consumers, are examples.
